

Richard Densmore is a United States Army Veteran who served his country during The Kuwait Conflict as well as being stationed in other areas as Germany and The States.

Richard went to Boot Camp shortly after he had graduated from high school; he was 19 years old when he went into the Service.

while Richard was in the Service serving his time in Kuwait he was flown back to the States and admitted to Walter Reed Medical Center in Bethesda Maryland. where he was diagnosed with a personality disorder and later released from the hospital and released from the military on a honorable discharge.

Throughout Richards time living back in the States he got married for several years and was his home sole supporter / provider; eventually got a divorce due to his wife was on substance abuse and mad for a very toxic environment - Richard is a very non violent person and doesn't like to be around drama or Drugs etc..

Throughout their marriage Richard came back and forth - Back home to our property and after The Divorce he just moved back home

Since he has been his 85 year olds Grandma's Bound the clock caregiver except when he goes to work. his grandma has health issues as well as dementia / alzheimers disease.

Richard and his grandma have always very close all his life.

Richard usually spends his days just keeping to himself or just doing the work around the Trailer and yard. Richards only basically taking care of his grandma and going to work, or spending time with his cat (Mitten's)

Richard is very well liked and is a good person with a big heart and would help anyone in need.

My Son and I have been very close all our lives - his Dad was shot and killed by a off duty Security guard when Richard was less than 2 years old. So its always just been me, Richard and his grandma Throughtout Richards life
